Updated Cummins® ISX Engine Kits

Interstate-McBee is proud to announce the additions of the **M-4376171, M-4376172, M-4376174 and M-4376175 In-Chassis Engine Kits** to our growing line of engine kits. These kits include the carbon scraper ring style cylinder liners that allow rebuild opportunities for ISX HPI dual cam models.

Scraper Ring placement

The new engine kits feature the 150mm **M-4376168 Cylinder Liner Kit**. Commonly known as an APR (Anti-Polishing Ring) Liner, which has a removable integrated carbon scraper ring at the top of the cylinder liner. This ring is designed to prevent carbon from contacting the cylinder walls while in operation.

Without the carbon scraping ring, the piston builds up with carbon causing the cylinder walls to become polished. This may result in increased oil consumption, decreased oil filter flow.

Engine Kits include:

- Cylinder Liner Kits
- 1-piece Low Ring Pack Pistons
- Premium Piston Rings
- In-House Manufactured Upper Gasket Set
- Connecting Rod Bearings
- Main Bearings

Cylinder Liner Kits include:

- Cylinder Liner
- Carbon Scraper Ring
- Liner Seal
- Liner Shim

Please note these newly updated Cylinder Liner Kits are not interchangeable with previous cylinder liner types.

See reverse side for a chart of all the ISX Carbon Scraper Ring Engine Kits carried by Interstate-McBee
