

AMERICAN FORGE & FOUNDRY

SLACK ADJUSTER RELEASE TOOL AND WRENCH SET

MODEL 45010

Slack adjusters are a critical components of the air brake system. If the slack is out of adjustment, it could lead to poor slowing and stopping performance. Avoid downtime and make sure brakes are operating at their best by using AFF heavy duty slack adjuster tools.

- Includes automatic slack adjuster release tool and wrench for adjusting automatic slack adjusters on Meritor brake systems.
- Fork-end tool able to fit securely under the pull pawl allowing hands-free operation to release the tension button
- 5/16" double square offset reversible wrench adjusts the brake and capable to release the anti-reverse mechanism without prying
- Cushion grip rubber handle provides superior non-slip grip and allows more turning power with less pressure and fatigue
- Thermoplastic handle material is resistant to most chemicals, solvents and oil
